>PROFESSIONAL EXPERIENCE

Campos Consulting and Development | Lead Developer | Abilene, Texas
10/2023 - present

- Spearheaded a team of four developers in the strategic refactoring of the Ridesmart project
- Transitioned PHP codebase to a more modern stack such as React, NextJS, NodeJS, and MongoDB
- Developed REST API and Integrated external APIs into the NodeJS backend such as real-time chat, zoom, and Authorize.net.
- Deployed robust CI/CD processes that improved the project's scalability and reliability by 50%, using a combination of AWS EC2, Route 53, Docker, terraform, and Jenkins.
- Created docker files, and built docker images for microservices to run on the Kubernetes platform.

Clutch | Full Stack Engineer | Los Angeles, California
06/2022 - 04/2023

- As a Front-End Expert with the Clutch Wallet team, I specialized in developing sophisticated user interfaces using a powerful stack of technologies including React, Next.js, TypeScript, and TailwindCSS.
- A significant aspect of my role involved integrating the Lens Protocol using web3.js, which allowed us to incorporate decentralized features into the wallet, enhancing its functionality and security.
- Throughout this project, I was deeply involved in every stage of the front-end development, from conceptual design to deployment, ensuring that all elements adhered to the highest standards of code quality and user experience.
- My contributions to developing a reliable and innovative platform were instrumental in Clutch Wallet raising $800k.
- Track deliverables to ensure timely and efficient production, resulting in the team's increased workflow of more than 20%.

Big Digital| Full Stack Engineer | North York, Ontario, Canada
06/2020 - 11/2021

- Developed and maintained outdoor and indoor kiosks for displaying sponsor information and key messages using react.js, next.js, and tailwindCSS for Golf Course Kiosk Website for NGCOA Events.
- Integrated interactive game experiences to engage attendees, enhancing the event's interactivity and enjoyment.
- Developed a comprehensive digital platform to promote the golf course's multiple amenities, including cafe, trails, and retreat services for the Droonton Golf Website.
- Involved in the implementation of procedures for gathering the requirements from clients for solution demonstrations.

>EDUCATION

Bachelor of Technology in Software Development, *New York City College of Technology* 05/2019
